

SCIENCE FOR THE BENEFIT OF HUMANITY

NEUTRALIZING HIV: THE FUTURE OF TREATMENT AND PREVENTION

Thursday, December 3, 2015 at 6 p.m.

Carson Family Auditorium, The Rockefeller University (1230 York Avenue at 66th Street)

The Rockefeller University invites you to join us and learn about promising new approaches to treat and prevent HIV. Hear about ongoing research with broadly neutralizing antibodies, components of the body's immune system that can be harnessed to attack HIV, and hear perspectives from scientists, doctors, HIV advocates, and volunteers in clinical trials about their experiences with HIV research.

- 5:45 p.m. **Registration opens**
- 6 – 6:45 p.m. **Hors d'oeuvres and networking**
- 6:45 p.m. **Welcoming remarks**
Sarah Schlesinger, M.D.
Associate Professor of Clinical Investigation, The Rockefeller University
- Fighting the HIV Epidemic: Past and Present***
Pat Fast, M.D.
Senior Technical Advisor at the International AIDS Vaccine Initiative
- 7 p.m. ***Broadly Neutralizing Antibodies: Overview and Ongoing Research Studies***
Marina Caskey, M.D.
Assistant Professor of Clinical Investigation, The Rockefeller University
- 7:30 – 8:30 p.m. **Panel discussion**
***What roles might broadly neutralizing antibodies play in HIV treatment or prevention?
Why participate in research?***
Sarah Schlesinger, M.D. (moderator)
Associate Professor of Clinical Investigation, The Rockefeller University
Roy (Trip) Gulick, M.D.
Gladys and Roland Harriman Professor of Medicine
Chief, Division of Infectious Diseases
Weill Cornell Medical College
Barry Zingman, M.D.
Medical Director, AIDS Center
Clinical Director, Infectious Diseases, Moses Division
Professor of Clinical Medicine, Albert Einstein College of Medicine
Pat Fast, M.D.
Senior Technical Advisor at the International AIDS Vaccine Initiative
Research participants who have enrolled in past or present trials to test strategies
to prevent or treat HIV
- 8:30 p.m. **Concluding remarks and networking**
