

WHERE DOES ORAL PREP FIT IN TO VACCINE AND AMP TRIALS?

Today, daily oral PrEP is not a part of the standard prevention package for HIV prevention trials. When will it join male and female condoms, STI treatment, harm reduction and other core components? The answer depends on the state of global PrEP rollout—and on advocacy. Here's a snapshot.

HVTN 704/ HPTN 085

- Brazil
- Peru
- United States

KEY

- PrEP approved
- Regulatory application filed or in process
- PrEP guidelines issued (national or clinical)

- Implementation studies
- Large-scale PrEP programming
- ** PrEP demo projects planned
