Targets that Worked: VMMC and ART

EVIDENCE

TARGET

RESOURCES

IMPACT

VMMC

Three trials show 60% reduction in HIV acquisition for HIV-negative men.

US President Obama sets PEPFAR goal of 4.7 million VMMCs by 2013. Combined 2012 and 2013 PEPFAR commitments quadruple 2011 funds. (2013) Pace of VMMC scale-up doubles each year after 2011 and target is exceeded. (2013)

ART

HAART saves lives, transforms managment of HIV. WHO "3 by 5" initiative sets goal of 3 million on ART by 2005.

Spending on global AIDS increases by 60% between 2003 and 2005.

3 by 5 isn't met but more than 13 million people are now on ART. (2014) Ending the AIDS Epidemic
